Patented Technology

Our patented industrial fan cleaning station is now available. Regularly maintaining your fans assists in ensuring that the air remains clean and fresh, reducing the amount of dust and contaminants that enter the atmosphere. By frequently cleaning the fans, it also helps to increase air flow throughout your environment. This results in safer working conditions for both you and your employees.

About SUSA Corporation

SUSA Corporation has over 30 years of experience in the custom industrial cleaning equipment and processing systems manufacturing industry. If you can dream it, we can create it. Our team of experts build innovative, state-of-the-art stations that assist in ensuring that your company is operating as efficiently as possible while saving you both time and money every single year.
